Company: Tucson Electric Power Company **Division:** Electric

Nature Of Opinion

Docket Number: E-01933A-15-0239

Docket Position: Against

My wife and I request that ACC reject TEP request for renewal of its 2016 REST IP. This request fro tariff increase from \$0.00800 to \$0.01300 constitutes an increase of 62.5%! In one shot! And all this to help subsidize those who've chosen to go solar. Solar users should pay no less than the cost of implementation. The rest of us should most certainly not pay to subsidize them. It's gotten to the point that we see several rate increases in various utilities every year. Let's see, Electricity, Natural Gas, Telephone, (Water, Sewer, Environmental Service which, unfortunately are city and county, so not under ACC regulation). We realize that the REST is a small part of our total electric bill, but still, 62.5%?! Oh yeah, I forget we have 0% inflation in our cost of living. Sure would be nice if we could increase our income by 62.5%, may be even just enough to cover the increase in our cost of living. We know from experience that we could never increase the price of ANY service or product provided by our businesses by 62.5%. Our children sure can't do it in their businesses either. Customers would just leave. Of course with monopolies, there is no choice to leave available.
